

Confidential Internet Customer Modular Data Center Infrastructure

PROJECT FACTS

TAS was selected by a leading internet customer as the module integrator to provide data center infrastructure to accelerate construction and reduce costs over traditional field erected execution. This initial phase enabled >8600 tons of data center cooling capacity data center capacity to come on line.

Total Module Count – 402.

Est. Steel Tonnage – 600

Over 26,000 manufacturing labor hours

Est. Pipe installed – 1.2 miles

Actual Production Time ~10 weeks.

Est. Bus Duct installed – 2.4 miles

Avg. Modules per Day – 6.7
